

Rajdeepsinh Gohil

Calgary, AB, Canada | rajdeepgohil000@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

SUMMARY

Data Analytics graduate with a BSc in Mathematics and one year of experience in regulated financial operations. Skilled in building end-to-end analytical workflows — from raw data and ETL pipelines through statistical modeling, machine learning forecasting, and executive-ready dashboards. Comfortable working with large, messy datasets and translating technical findings into clear, actionable insight for non-technical stakeholders. Based in Calgary, open to Data Analyst, BI Analyst, Business Analyst, and Operations Analyst roles across Alberta and remote.

TECHNICAL SKILLS

Programming & Data: Python (pandas, NumPy, scikit-learn, statsmodels, XGBoost, TensorFlow/Keras, Prophet), SQL (joins, CTEs, window functions), PostgreSQL
BI & Visualization: Power BI (DAX, data modeling), Tableau, Matplotlib, Microsoft Excel (advanced)
Machine Learning & Statistics: ETL pipeline development, feature engineering, time-series forecasting, hypothesis testing, regression analysis, model validation
Databases & Tools: PostgreSQL, Git/GitHub, Jupyter Notebook, VS Code
Domain Knowledge: Financial Services Operations, Auto Finance, Mortgage Servicing, Bankruptcy Operations, Consumer Complaints Analytics, Healthcare Analytics, Energy Sector Analytics

PORTFOLIO PROJECTS

CFPB Complaint Operations Analysis | *Python, PostgreSQL, Power BI* | [GitHub](#)

- Built a Python ETL pipeline and PostgreSQL data model processing **8.67M** public consumer complaint records, with a multi-stage SQL validation layer ensuring data accuracy before reporting.
- Engineered a workload-effort proxy KPI and delivered a 2-page Power BI executive dashboard identifying complaint volume, untimely-response risk, and operational burden patterns across Credit Reporting, Debt Collection, Checking/Savings, and Mortgage product lines.
- Identified a **99.75%** timely response rate across the analyzed complaint population.

Alberta Electricity Load & Generation Mix Forecasting | *Python, XGBoost, LSTM, Tableau* | [GitHub](#)

- Built and benchmarked five forecasting models — baseline, ARIMA/SARIMAX, Prophet, XGBoost, and LSTM — against a 2024 holdout test set, engineering 20+ features from weather, seasonal, and regional variables.
- Best model (XGBoost Direct) achieved **70.16 MW MAE (1.02% relative error)** against actual Alberta electricity demand.
- Delivered a 4-page Tableau dashboard covering demand trends, regional load, generation mix, and surge-hour behavior for non-technical stakeholder review.

Hospital VBP Financial Disparities | *Python, statsmodels, OLS Regression, Hypothesis Testing* | [GitHub](#)

- Merged four public datasets — CMS HCRIS cost reports, Medicare Value-Based Purchasing adjustment factors, CDC Social Vulnerability Index data, and county crosswalks — to examine hospital financial performance drivers.
- Ran 10 hypothesis tests and an OLS regression with HC3 robust standard errors, identifying a statistically significant rural-urban operating margin gap (**p = 0.0038**).

WORK EXPERIENCE

Financial Analyst

Jun 2023 – Jul 2024

AIS Business Solutions Pvt Ltd (US Clients: Auto Finance, Banking, Mortgage Servicing)

Vadodara, India

- Reviewed post-bankruptcy auto finance accounts for US financial services clients, including Chapter 7 and Chapter 13 discharge-related account updates using Ally Financial’s loan servicing platform.
- Reconciled loan payment histories, outstanding balances, reaffirmation details, and account status information using internal loan servicing systems and Microsoft Excel.
- Identified account-level discrepancies in post-discharge balances, payment records, and documentation, escalating exceptions to senior reviewers for resolution.
- Prepared structured account summaries and operational reports supporting client-facing deliverables across auto finance, banking, and mortgage servicing workflows.
- Worked within a regulated financial operations environment requiring accuracy, documentation control, and compliance with US bankruptcy and account servicing procedures.

EDUCATION

Graduate Certificate — Data Analytics for Business

Sep 2024 – Apr 2026

St. Clair College

Windsor, ON, Canada

- GPA: 3.94 / 4.0** | Machine Learning, Statistical Analysis, Python, SQL, Power BI, Data Visualization, Business Intelligence, ETL Development

Bachelor of Science — Mathematics

2019 – 2022

Maharaja Sayajirao University of Baroda

Vadodara, India

- Calculus, linear algebra, probability, and statistics.
